## The Best school.

*Loic Notar Wuotto*

For me being in this school for 12 years means so many things, feelings, and emotions. I remember when I first came to the school, I was young, they put me on 1st preprimary I had many friends but when the year finished I had to stay in the same grade with new friends that accepted me in their group.

I was so sad because I wasn't staying with my friends of the other group, but my favorite teacher Miss Malu always helped me and advised me.

The things I like about this school is that I feel like I am at home, I feel that my friends are my brothers and sisters, I feel that the teachers are my advisers, I feel that even the things are going wrong, at home or with my friends or my parents I can come here and talk with some one that is always going to help me.

Now a day I am studying 9th grade of junior high school, I feel that this is like my family, sometimes I have problems with teachers or friends but I can always solve this problems by talking face to face, or if the problem still not solved we have the best director that always hear both sides of the problems and always take the best decision.

Changing of topic I would like to share my story about a graduation trip that we just made, here I come: A few months ago my group just went on a graduation trip with some teachers. And that's pretty cool if you ask me, it was my best trip ever. The things that we went through, the moments we shared together, the emotions and friendship no one is going to take those. Like I said being in this school it's the best that I have ever been ever been.

Now that the school is having his 15-year-old Anniversary I would like to say that every teacher, every student, Miss Tere, Lic. Abel Santoyo we have all together made up this school to become the best school.

Thanks teachers, thanks Miss Tere and thanks parents for always being there when I need, this means so much to me. Love you guys!
